

AMENDMENTS TO THE SPECIFICATIONS

Please replace paragraph [0056], beginning on line 7, page 31 with the following replacement paragraph:

[0056] The components (1)-~~(4)~~(3) were added to a part of the component (7), and the resultant mixture was processed by a roller (pigment part). On the other hand, the component (4) was dissolved in a part of component (10) (dye part). The components (5)-(9) were heated to 90°C, and dissolved. The dye part was added to the mixture, and was dispersed uniformly by a homo mixer. The mixture was filled to a prescribed container after being dispersed to prepare a blusher. Table 5 shows the evaluation results.
